

## DESCRIPTION OF THE PROGRAMME COMPONENT

By submitting the specifications and annexes electronically, you provide the evaluators with information that will help them to gain a complex overview of the content of the programme component and to evaluate the proposal objectively. The recommended length of the specifications is 15-20 pages.

### 1. INTRODUCTION OF THE APPLICANT AND PARTNER ORGANISATIONS

#### 1.1 Description of the applicant organisation (the same information must be provided for each partner separately) General information

- Name, area(s) of activity, owner(s), legal status, number of employees, decision-making procedures, other general characteristics. Relevance of the project to the applicant's professional activities.

##### 1.1.2. Financial situation

- Presentation of the applicant (partner) organisation's financial situation and evidence of its financial stability: presentation of its main revenues and costs, taking into account the last financial year.

##### 1.1.3. Relevant professional experience of the applicant organisation

- The expertise, experience and preparation of the applicant (partner) organisation's professionals at organisational level or employed or otherwise involved in the preparation and implementation of projects, in particular projects with a similar purpose or of a similar size.
- references, in particular previous experience similar to that of the proposed activity

#### 1.2 Civil partner and its activities in the implementation of the programme component

##### 1.2.1. Brief description of the cooperating NGO(s) as described in point 1.1

- references, in particular previous experience similar to that of the proposed activity

### 2. RELEVANCE OF THE PROGRAMME COMPONENT

#### 2.1 Relevance of the programme component: the contribution of the planned activities to the Cooperation Programme

- to achieve its overarching objectives (see chapter 1.6 of the General Application Guidelines),
- horizontal principles (see chapter 1.5 of the General Application Guidelines).

### **3. ENVIRONMENTAL IMPACTS OF THE PROGRAMME COMPONENT**

Measures taken to reduce the negative impact of the activities on the environment (e.g. waste management, noise and water protection, nature protection, etc.)

### **4. A DETAILED DESCRIPTION OF THE PLANNED ACTIVITIES**

#### **4.1 Detailed description of the planned activities of the programme component:**

- 4.1.1 A brief geographical, economic and social description of the area of the proposed activity
- 4.1.2 Technical feasibility of the site(s) selected for the planned technical activity(ies) of the programme component
- 4.1.3 Technical activity(ies) envisaged for the programme component
  - a detailed but comprehensible description of the technical content of the implementation (e.g. technologies used, justification for new equipment and its technical parameters, innovative solutions, etc.)
  - presentation of the demonstration of performance of the indicators undertaken, calculation methodology
  - a brief textual description of the expected results and impacts, with particular reference to the expected environmental impact in the municipality or sub-region concerned.
- 4.1.4 Assessment and evaluation of potential constraints (e.g. heritage protection, nature conservation, other mining activities, etc.) or other environmental risks (e.g. flood risk, surface movement, etc.).

#### **4.2 Documents to be attached to justify descriptions of planned professional activities:**

- Site plan for all geothermal energy production activities (according to 4.1.2),
- Relevant technical documentation, drawings (according to 4.1.3).
